Oilography
Lab Data Submission
Version # 2022.04.26-02

Data Submission

There are several ways to submit oil sample data to Oilography. The two main methods are:
1. Upload through the TF7 email system
2. Upload directly through the TF7 OilDataSubmissionProcessor

Each method can accept multiple file types including .csv, .xlsx, and .xml.

Email Upload

Send sample data .csv file via email to OilographySubmission@tf7.com. Emailed submission files will automatically process the day after the submission is received and will display once automated processing is complete.

Direct Upload

Use the link below to upload oil sample data directly to Oilography. Oilography processes each .csv file, by lab format and lab format updates. Each time a new lab is added, or an existing lab updates their file formats, the direct upload must also be reformatted to accommodate the changes.

The following URL leads to the direct upload page:
https://tf7.com/OilographyDataSubmissionProcessor/OilDataUserSubmissionPage.aspx

PROCESSED DATA IS IMMUTABLE. VERIFY DATA ACCURACY BEFORE UPLOAD.

CSV Submission

Submission

File data must be submitted in a preapproved format. Acceptable .csv file data is formatted with clearly defined column headers and customer identification.

Processing

Successful processing requires that users provide data in preapproved formats before final submission. If the submitted file's format is inconsistent with the approved format, the upload will fail.

- Column headers must be consistent with each submission
- Only one customer allowed per submitted .csv file
